

PROCESS SAFETY
SOFTWARE

PrimaTech
Specialists in Safety, Security and Risk

Primatech's flagship software, PHAWorks, enables you to perform safety and security PHA studies using HAZOP, What If, Security Vulnerability Analysis, and many other methods. The design of PHAWorks is based on a legacy of developing PHA software for over 35 years backed by a company that has facilitated thousands of PHA studies world-wide.

HOW PHAWORKS CAN HELP YOU

FAST AND EFFICIENT

PHAWorks enables fast setup and provides integrated tools that streamline data entry. Users perform studies faster and more efficiently than with any other software.

LIMITLESS FLEXIBILITY AND CUSTOMIZATION

You can match the specific requirements of your organization by utilizing customization features in PHAWorks. Our software solution easily adapts to meet your organization's goals and changing needs.

ALL-IN-ONE SOLUTION

Perform all your safety and security studies using a single platform. PHAWorks covers all methods required by regulations and industry standards, and more.

CUSTOM REPORTS

PHAWorks provides an extensive set of pre-defined study reports that can be customized by users.

ACCLAIMED SUPPORT

We're committed to helping and educating our users. For over 35 years Primatech has provided one-on-one personalized support to our users.

"PHAWorks RA Edition - Using this software makes it easier to complete PHA's for sure. This software is very easy to navigate and document every aspect of PHA. The ability to populate reports for audits and whatever else you may need is very easy. Even users that have never used software like this can easily navigate thru each section and it gives you the ability to worry about the hazards you are discussing and not worry about trying to learn how to use the software. When a question does arise, the Primatech Team responds to questions in a timely fashion"

- Safety Coordinator, Specialty Chemical Manufacturer

INTEGRATED PHA AND LOPA

Seamlessly conduct LOPA together with PHA in the same worksheet. PHAWorks enables you to complete LOPA for your study without duplicating scenarios in a separate worksheet.

TECHNICAL GUIDANCE

Whether you are new to PHA or an experienced practitioner, our software guides you through your project from start to finish to produce comprehensive results.

AUTOMATION

Use AI and algorithms to classify your PHA data, generate analytics, and provide worksheet entries automatically.

ACTION TRACKING

Track study recommendations to completion using the tracking feature in PHAWorks.

ANALYTICS, METRICS, AND DASHBOARDS

Analytics and metrics provide deep insights into sources and types of process risks to support your process safety management program. Dashboards provide summaries of project data for comparison with norms.

BOW TIES

Generate bow tie diagrams automatically from the hazard scenarios in your PHA worksheets to clearly communicate process risks and manage safeguards effectively.

While PHAWorks RA Edition provides the full range of benefits listed above, PHAWorks Lite is a simpler and lower cost alternative to our full featured PHAWorks RA Edition.

Please contact us regarding our other products including AUDITWorks™ and PHA Partner™.

“As a contract PHA facilitator, I have used both PHAWorks RA Edition and PHA-Pro in conducting PHA studies for clients. I have found PHAWorks RA Edition to be much easier to use than PHA-Pro. It provides a friendlier user interface and has important features not present in PHA-Pro, most importantly for the LOPA interface. I know I can perform a study faster and more easily with PHAWorks RA Edition”

- Independent Contractor

CONNECT WITH US

 Primatech Inc.

 @PrimatechPSM

PrimaTech
Specialists in Safety, Security and Risk

We're here to assist you with your process safety and security programs

Primatech provides consulting services to help companies that use hazardous materials to reduce the likelihood and consequences of potential release events. Our consultants perform a wide range of services for process industry companies.
